Epoch Global Choice Fund (the "Fund")

GLOBAL CHOICE A INSTL EUR (IE00BDF11V66)

a Fund of Epoch Investment Funds plc

This Fund is managed by Epoch Investment Partners, Inc.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The Fund seeks to provide long-term capital growth with lower than average volatility by investing in global companies with superior risk-reward profiles.

Investment Policy

The Fund invests typically in a concentrated (20-35 companies) portfolio of long positions of global equity securities (e.g. companies' shares) which are listed or traded on regulated markets and exchanges. The Fund can invest in global companies across a range of market capitalisations and sectors including a small amount of investment in emerging markets' companies. Companies are chosen based on their growth potential and their consistent ability to generate free cash-flow and allocate it intelligently to benefit shareholders. Such companies are typically less volatile due to their consistent ability to generate and grow

cash flow. The Fund may hold both USD denominated securities and non-USD denominated securities.

Fund Currency

The reference currency of the Sub-Fund is USD.

Income

Any income the Fund generates will not be paid out but will instead be reinvested to grow the value of your investment.

Investment Horizon

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Subscription and Redemption

You can buy and sell shares in the Fund on any day that banks in Ireland and the New York Stock Exchange are open.

RISK AND REWARD PROFILE

This risk indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The lowest category does not mean risk free.

The risk and reward category may shift over time and is not guaranteed.

Your investment in the Fund is not guaranteed. The Fund is invested in financial assets and instruments and uses financial techniques that are subject to levels of variation, that may result in gains or losses.

A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making high gains. The seven-category scale is complex, for example, 2 is not twice as risky as 1.

Why is this Sub-Fund in this category?

Funds of category 6 have shown in the past a medium to high volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 6 might be subject to medium to high price fluctuations based on the historical volatility observed.

Are there any other particular Risks?

Investment risk - the Fund invests in securities globally, share prices can rise or fall due to a number of factors affecting global stock markets.

Concentration risk - the Fund's investments are concentrated in the US. This means the Fund may become more susceptible to fluctuations in value resulting from adverse economic or business conditions in the US. The Fund may be subject to a greater degree of risk and volatility than a fund following a more diversified.

Currency risk - the Fund is denominated in US Dollars but may hold assets denominated in other currencies. The value of your shares may rise and fall as a result of exchange rate movements between these currencies.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

CHARGES

The charges you pay are used to pay the cost of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
